

**NATIONAL CAPITAL PRESBYTERY, PC(USA)  
VOTED TO DIVEST FROM FOSSIL FUELS ON MARCH 23, 2021**

***YCAP is a program of the Earth Care Network of National Capital Presbytery***, involving an intergenerational partnership of youth and adults in the presbytery seeking to fulfill the 2006 PC(USA) 'carbon neutral lives' resolution by advocating for net-zero greenhouse gas emissions in the church while measuring current emissions and monitoring reductions over time.

This Earth Day, YCAP released *our article on National Capital Presbytery's 3/23/21 decision to divest from fossil fuels* and we invite you to take another step towards a net-zero denomination by completing *our building portfolio survey*, answering questions about your congregation's building/s and associated energy usage.

**Just released for Earth Day:**

Claire Wilson-Black & Anne-Fleur Winter of YCAP review National Capital Presbytery's recent Divestment decision, interviewing David Kepley and Mark Eakin of the NCP Earth Care Network.

**READ** *the divestment article* posted on the Presbyterian Hunger Program's Food & Faith blog and downloadable on the Eco-Stewards site [here](#).

To build upon this momentum, YCAP is completing a greenhouse gas inventory of National Capital Presbytery's buildings to examine the NCP carbon footprint.

We invite you to complete our survey about your congregation's energy usage to support our carbon footprint project in National Capital Presbytery. Complete the survey here, hosted on kobotoolbox: <https://ee.kobotoolbox.org/x/HKuTUovk>
