

Youth Carbon Analyst Program (YCAP)

YCAP began in the 2018-2019 year as a network of youth counting greenhouse gas emissions (GHGs) in the churches in our presbytery. Their goal is to (1) calculate the GHG emissions of churches and the presbytery as a whole and (2) to outline pathways for the presbytery to reduce these emissions. YCAP is a project of the Earth Care Network of the National Capital Presbytery. YCAP is housed and sponsored in Fairlington Presbyterian Church and led by David Grace (3030.dave@gmail.com).
