STEWARDSHIP COMMITTEE

USING ARTIFICIAL INTELLIGENCE
IN STEWARDSHIP

This talk will overview recent developments in the field of AI by showing specific examples of how it can be used for stewardship. The goal of the talk is to provide an orientation to generative AI, as well as background about why it has developed so rapidly in the last year. The main focus will be on specific examples and use cases that illustrate some of the new ways AI is being used to generate text, images, music and video. Though the talk will cover some theoretical subjects, the main goal is to empower the audience to get started or go deeper in using AI for practical purposes. No previous background or experience is necessary.
